PROFESSIONAL SUMMARY

Motivated BSc Computing with Finance student at the University of Botswana, awaiting final semester results. Skilled in full-stack web development with hands-on experience building and deploying production-grade applications, including finance trackers, mental wellness platforms, chatbots, and admission portals. Contract full-stack developer with practical industry exposure and a strong foundation in Agile Product Management, Cybersecurity, Cloud Infrastructure, and AI/Web Development. Recognized for hackathon success, teamwork, and delivering high-quality solutions under tight deadlines.

TECHNICAL SKILLS

Core Languages & Technologies

- **Languages:** Python, JavaScript (ES6+), TypeScript, Java, PHP, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React 18, Node.js, Express.js, Tailwind CSS, Recharts, Leaflet, Framer Motion, Pandas, NumPy, Matplotlib, Seaborn
- **Database & ORM:** PostgreSQL, MySQL, Prisma ORM, Firebase Firestore
- **Cloud & DevOps:** Git/GitHub, Netlify, Railway.app, Render, Oracle Cloud Infrastructure (OCI), Firebase
- **AI & Data Science:** Prompt Engineering, NLP APIs, Statistical Analysis, Data Visualization, Bias Mitigation
- **Security:** JWT & bcrypt, Endpoint Security, Network Defense, Cyber Threat Management, Checksum Verification
- **Tools:** Postman, Prisma Studio, VS Code, Figma, Nodemailer, Multer, Mailgun
- **Methodologies:** Agile, Scrum, Rapid Prototyping, REST API Design

Final Year Project — Additional Skills

Frontend Development

- **React 18:** Component-based UI development, hooks, context API
- **Vite:** Fast build tool and development server
- **Tailwind CSS:** Utility-first styling, responsive design
- **Recharts:** Data visualisation (line, area, pie, radar charts)
- **Leaflet:** Interactive maps and GPS location features
- **Framer Motion:** Smooth animations and transitions

Backend Development

- **Node.js & Express.js:** REST API design, middleware, error handling
- **JWT & bcrypt:** Secure authentication and password hashing
- **Nodemailer:** Email notification system
- **Multer:** File upload handling (temporary and permanent storage)

Database & ORM

- **PostgreSQL:** Relational database design, complex queries, indexing
- **Prisma ORM:** Type-safe database access, migrations, schema design

Tools & Practices

- **Git & GitHub:** Version control, branching, collaboration
- **Postman:** API testing and documentation
- **Prisma Studio:** Database browsing and debugging
- **VS Code:** Development environment

Soft Skills

- **Project Management:** Agile methodology, milestone tracking, weekly reporting
- **Problem Solving:** Debugging performance issues, queue rebalancing, file path resolution
- **Technical Documentation:** Writing API docs, user manuals, final year report
- **Presentation & Communication:** Prepared and delivered final project presentation to faculty panel

WORK EXPERIENCE

Full Stack Developer (Contract) | InRent | Gaborone, Botswana | Feb 2026 – Apr 2026

- Developed full-stack features for student housing management platforms serving university students and landlords
- Built and deployed production-ready systems including email infrastructure, authentication, and document management
- Implemented real-time dashboards, live charts, and rule-based alert systems
- Integrated databases, REST APIs, and third-party services (Mailgun, Firebase)
- Collaborated directly with stakeholders to translate requirements into technical solutions
- Delivered complete code and database handover upon contract completion

Technologies: React, TypeScript, Node.js, Express, Firebase Auth, Firestore, Prisma, PostgreSQL, Mailgun, Tailwind CSS, Git, GitHub, Render

Technology & Digital Student Attaché | Mascom Wireless | Botswana | Jun 2025 – Jul 2025

- Gained hands-on experience across Network Operations, Cybersecurity, and Digital Platforms departments
- Contributed to testing, documentation, and process improvements in a corporate telecommunications environment
- Shadowed industry experts to understand best practices in IT and digital infrastructure

PROJECTS & HACKATHONS

GeneShield – Cavista Hackathon 2026 (Overall Winner & Theme A Winner) | February 2026 | Gaborone

Stack: HTML, CSS, JavaScript, Python, Ollama, Workbench, Random Forest, LightGBM, XGBoost, Logistic Regression

- Served as Full Stack Developer for GeneShield, an AI-powered hereditary cancer risk and prevention platform built for Botswana and Southern Africa
- Led frontend development and coordinated end-to-end project delivery across a 4-person team within 24 hours
- Built a hereditary cancer risk engine using Logistic Regression, with Workbench for data persistence and auth

CoinWise – Personal Finance Tracker — <https://coinwise-app.netlify.app> | Oct 2025 – Present

Stack: React, JavaScript, Tailwind CSS, HTML5, CSS3

- Developed a full-stack React application for tracking personal income and expenses
- Implemented modern, responsive UI using Tailwind CSS and PostCSS for cross-device compatibility

WealthWise – GirlCode Hackathon (5th Place) | Oct 2025

Stack: HTML, CSS, JavaScript, Node.js, Python (Railway.app, Netlify)

- Collaborated in a team to develop a financial tech solution under time-constrained hackathon conditions at Absa Bank Botswana
- Demonstrated rapid prototyping, problem-solving, and presentation skills

MindMoor – Mental Wellness Platform — <https://mindmoor.netlify.app> | Jun 2025 – Present

Stack: HTML, CSS, JavaScript (deployed on Netlify)

- Built a mental wellness web platform providing a safe digital space for users to explore mental health resources
- Deployed and maintained on Netlify with GitHub CI/CD integration

Thuto Ke Thebe – University Admission System | Feb 2025 – Apr 2025

Stack: HTML5, CSS3, JavaScript, PHP, MySQL

- Led development of a secure online admission portal engineered to handle 500+ concurrent users
- Built automated credential system with random password generation, SMTP email delivery (40% higher open rates), and bcrypt hashing
- Implemented tamper-proof document upload with client-side validation and server-side checksum verification
- Developed admin dashboard for merit-based applicant ranking using weighted academic metrics

Additional Deployed Projects — <https://ramokhua-portfolio.netlify.app>

Stack: React, JavaScript, HTML/CSS, Netlify

- Portfolio site, customer survey tool, quantum computing landing page, and other client-facing web projects all live on Netlify

EDUCATION

BSc Computing with Finance | University of Botswana | | *Aug 2022 – May 2026*

Year 4 of 4 | Key courses: Database Systems, Web Technologies (HTML/CSS/PHP), Programming (Java), Finance, Software Development, Networking

BGCSE | Kagiso Senior Secondary School | | *2020 – 2021*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

2026

- AI Fundamentals (DataCamp)

2025

- Professional Diploma in Agile Product Management (Udemy)
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate (Oracle)
- Responsive Web Design (freeCodeCamp)
- SheCodes Plus, Plus AI & Plus Add-on (SheCodes)
- Prompt Engineering for Everyone (Cognitive Class)
- Introduction to Data Science (Cisco)

2024

- SheCodes Basics & Basics Add-on (SheCodes)
- JavaScript Essentials 1 (Cisco)

2023

- Endpoint Security, Network Defense, Cyber Threat Management, Introduction to Cybersecurity (Cisco)

LANGUAGES

- English – Fluent
- Setswana – Native
